

SCIENCE CHINA	
Mathematics	
CONTENTS	Vol. 61 No. 11 November 2018
Preface	1923
Reviews	
On Du Guang's conjecture: Recent progress and open problems Hardy Chan & Jianzhong Wei	1925
Normal forms of linear second order partial differential equations on the plane Alexey Davydov	1947
Nonlinear time-harmonic Maxwell equations in a bounded domain: Lack of compactness Jenshol Mielnik	1963
Articles	
Extremes of threshold-dependent Gaussian processes Long Bai, Krzysztof Dębicki, Eikefried Harbers & Lutzeng Ji	1971
Weak-strong uniqueness for the compressible Navier-Stokes equations with a hard-sphere pressure law Eduard Feireisl, Yong Lu & Antonín Novotný	2003
On the nodal stabilization by starting control of the heat equation generated from the Helmholtz system Andrey Furukov & Lyubov Oshpora	2017
On the global existence of weak solutions for the Cucker-Smale-Navier-Stokes system with shear thickening Seung-Yeal Ha, Hee-Kil Kim, Jae-Myoung Kim & Jinyong Park	2033
Dissipative structure for symmetric hyperbolic systems with memory Shoichi Kawashima & Shogo Taniue	2053
A note on the ill-posedness of shear flow for the MHD boundary layer equations Chang-Ho Lee, Feng-Xia & Tong Yang	2065
Efficient combinatorial algorithms for quickest evacuation planning Umesh Pyrialanki, Harjinder Nath & Tanika Nath Dhamija	2079
On the primitive divisors of the recurrent sequence $u_{n+1} = (kn+1)(2n/7) - 1$, $n \geq 0$, with applications to group theory Martin Vucemiro	2101
Global well-posedness of the MHD equations via the comparison principle Dongyi Wei & Zhifei Zhang	2111
